SIGHTS · KIATO & SIKYONIA

Archaeological Museum of Feneos

The Archaeological Museum of Feneos gathers and presents finds from the excavations at Ancient Feneos and the wider area. Among the exhibits are sculptures, vases and other objects, drawn largely from the Asklepieion and the acropolis, that shed light on daily life and worship in this important Arcadian city. It makes an ideal complement to a visit to the nearby archaeological site, helping bring the ruins and their history into sharper focus.
