SIGHTS · KIATO & SIKYONIA

Sikyona Environmental Education Centre

The Sikyona Environmental Education Centre is based in mountainous Klimenti, on the slopes of Lesser Zireia at around 980 metres. In just a short drive visitors rise from the sea at Kiato to the cool, forested world of the mountain. The Centre runs educational programmes for schools and groups, introducing them to the local flora, ecosystems and the wider cause of environmental awareness. Its setting, among some of the most beautiful scenery in the Sikyona highlands, is a lesson in itself.
