Holy Trinity Church, Vasiliko

The Church of the Holy Trinity stands in Vasiliko, the village that spreads out beside the archaeological site of Ancient Sikyon. A stone-built Byzantine monument and the settlement's principal church, it is prized for its age and its austere medieval architecture. From its elevated setting visitors take in a superb sweep of the Corinthian Gulf, the Vocha plain and the citadel of Acrocorinth, making it a natural companion to a tour of the ancient city.
