SIGHTS · KIATO & SIKYONIA

Black Pine Forest – Velina

Near the village of Velina spreads a rare, natural forest of black pine, a self-seeded green haven that has remained largely undisturbed over the centuries. Listed among the European Union's priority habitats, it shelters a wealth of flora and fauna and plays a vital role in holding water and soil on these mountain slopes. It is an ideal spot for gentle walks, offering cool shade in summer and glorious colours in autumn.
