SIGHTS · KIATO & SIKYONIA

Archaeological Museum of Ancient Sikyon

The Archaeological Museum of Ancient Sikyon stands within the archaeological site itself, housed in part of a well-preserved Roman bath complex restored in the 1930s. Its galleries display finds from Sikyon and the surrounding area, including vases, sculpture, mosaic floors and Early Christian remains, tracing the long history of the city from prehistoric through to Byzantine times. A compact but rewarding stop that brings the ruins outside to life.
